

STandUP *for* ENERGY

16 MAJ 2019
AULAN
NORRA LATIN
STOCKHOLM

Welcome to the StandUp Academy 2019!

Game Changers in the Energy Transition

This year's StandUp Academy will look into the future: What technologies will be the winners, which have yet to be developed, and what will be needed to make them useful for society? In this important discussion we have invited several distinguished guests from public office and industry:

Eva Krutmeijer
Moderator

Anders Ygeman
Minister of Energy
and Digitalization

Robert Andrén
Director General of the
Swedish Energy Agency

Johanna Lakso
CEO Power Circle

Catarina Naucler
R&D Manager
Fortum

Fernanda Lodi Marzano
Technology Leader
Electrification Scania

Yvonne Ruwaida
Business Strategy
Vattenfall

Research and innovation are central to a successful energy transition. The challenges are so great that they must be tackled from many fronts simultaneously. Building strong research environments with different competencies has never been so important. We will end our meeting with a discussion about what is needed to build and maintain excellent energy research environments like StandUp for Energy.

Welcome!
